

SMARTOSCOPE

DIGISCOPING SOLUTIONS, MADE IN AUSTRIA

*Digiscoping*

*the smart way.*

*The Gyrfalcon (*Falco rusticolus*) is the largest of the falcon species, this majestic bird of prey, unlike other falcons circles high in the sky as it searches for prey. It breeds on Arctic coasts and tundra, and the islands of northern North America and the Eurosiberian region.*

## SMARTOSCOPE VARIO-ADAPTER

*Universal digiscoping adapter for smartphones.*

Attaching your smartphone to a spotting scope or binocular to record close up detailed images of the natural world can be one of the most engaging and enjoyable experiences for any outdoor enthusiast, creating lasting memories and capturing incredible moments.

The SMARTOSCOPE VARIO-ADAPTER is designed to enhance this experience to a new level by delivering a truly universal smartphone digiscoping solution that is engineered for maximum convenience and ease of use.

The design team behind the SMARTOSCOPE VARIO-ADAPTER are pioneers in the world of smartphone digiscoping and have poured every ounce of their experience out in the field to produce an adapter that truly elevates the smartphone digiscoping experience.

The SMARTOSCOPE VARIO-ADAPTER can accommodate most smartphone phone models of any brand, large or small in size with single or multiple camera lenses to give you full creative control over your digiscoped images and video.

Every component is highly engineered, utilizing premium materials for unparalleled levels of fine tune adjustment and secure, stable connection.

*This is how smartphone digiscoping should be.*

## DESIGNED BY DIGISCOPERS FOR DIGISCOPERS

*Truly universal.*

- ① A body crafted from aluminium and components made of high grade polyoxymethylene "POM-C".
- ② A smooth opticsrail aligns your chosen smartphone camera lens perfectly with the eyepiece of the spotting scope.
- ③ The opticsrail features a screw thread to allow connection of smartphone adapter rings to connect the unit to an eyepiece.
- ④ A finely engineered locking wheel instantly secures the opticsrail in the position you set without play or movement.
- ⑤ The phone clamp adjusts to accommodate even very large smartphone models.
- ⑥ The clamp adjustment thread secures the smart phone.
- ⑦ The phone clamp and base are angled to help secure the smartphone and prevent slipping.
- ⑧ Protection rubber is utilised at key points to eliminate friction between the smartphone and the adapter plate ensuring a stable, scratch free fitting.
- ⑨ The main plate has 2 recessed rubber strips that serve both as anti-slip protection and as a support surface that is gentle on the housing.

*Truly usable.*

ATTACH

## SIMPLICITY IS THE KEY

*So convenient, you might have to remind yourself it's universal.*

Out in the field is when you truly appreciate the research and development that went in to producing the SMARTSCOPE VARIO-ADAPTER.

Seconds count - it can mean the difference between capturing that once in a lifetime image or not, that's why every design feature has been considered with the goal of producing a universal smartphone digiscoping adapter that is quick to set up, adjust and use.

The engineering delivers smooth, fine adjustments for perfect camera lens alignment every time and once you lock the opticsrail it stays locked - no play, no movement, no frustration.

Simply **INSERT** your smartphone in to the adapter and clamp it into place, adjust the opticsrail to **ALIGN** with your camera lens, **CONNECT** a smartphone adapter ring and **ATTACH** the assembly on to your scope eyepiece. The phone sits securely in the adapter with no risk of slipping or falling. Lens alignment remains in place all day. Job done.

*In the past, a universal adapter has meant compromise.  
Not any more.*

## SMARTOSCOPE UR-4 *Adjustable Eyepiece Adapter*

Sold separately

A truly universal smartphone adapter deserves a universal eyepiece ring.

The SMARTOSCOPE UR-4 is a high quality, adjustable eyepiece adapter ring which securely attaches to the opticsrail of SMARTOSCOPE VARIO-ADAPTER via a 30mm thread.

It is the gateway between the smartphone adapter and the eyepiece and allows connection to most spotting scope eyepieces from small to large.

Four adjustment screws engage the inner compression ring which is used to secure the adapter ring on to your eyepiece without damaging or marking the eyepiece cap.

The ring includes adjustment rubber strips to reduce the inner diameter of the adapter ring for extra versatility and compatibility to most eyepieces of any brand.

## EYEPIECE ADAPTER RING CONNECTION OPTIONS *SMARTOSCOPE Opticsrails*

### SMARTOSCOPE Opticsrail K30

Opticsrail K30 is included with the SMARTOSCOPE VARIO-ADAPTER and is for use with the SMARTOSCOPE UR-4 eyepiece adapter and Kowa digiscoping eyepiece rings with a diameter thread of 30mm.

### SMARTOSCOPE Opticsrail Z13

Optional opticsrail (sold separately) for use with Zeiss digiscoping eyepiece rings with a diameter of 13mm.

### SMARTOSCOPE Opticsrail S15

Optional opticsrail (sold separately) for use with Swarovski PA adapter eyepiece rings with a diameter thread of 15mm.

### SMARTOSCOPE Opticsrail S16

Optional opticsrail (sold separately) for use with Swarovski AR adapter eyepiece rings with a diameter thread of 16mm.

## KM ADAPTER PLATES

KM adapter plates are compatible with Opticsrail K30 and reduce the 30mm thread down to 13/15/16mm for use with Zeiss and Swarovski eyepiece rings.

**KM30-ZM13**  
30-13mm

For use with Zeiss eyepiece rings with a diameter of 13mm.

**KM30-SM15**  
30-15mm

For use with Swarovski PA eyepiece rings with a diameter of 15mm.

**KM30-SM16**  
30-16mm

For use with Swarovski AR eyepiece rings with a diameter of 16mm.
